Matt Sadi of C & M Concrete In St. Louis, Missouri, USA

Matt Sadi (C & M Concrete)

Matt is making history with Rubaroc! Although he is a specialist in traditional & architectural/stamped concrete surfaces, his passion for Rubaroc is evident. "Rubaroc is fluid, it can be manipulated into a myriad of design possibilities," says Matt. He continues to say "the flexibility of the rubber surfacing means that beautiful works of art can be incorporated into a flooring surface that also is crafted to reduce the risk of slips & falls." It is with great pleasure to acknowledge & congratulate Matt Sadi & his crew for the Rubaroc installation of over 10,000 sq ft in Lake of the Ozarks project! The installation is in progress. Here are some pictures that are available.... What a view!

This transformation speaks for itself.... Style, safety & beauty all-in-one!

Beautiful transformation @ the Lake of The Ozarks property in Missouri, USA & a stunning view to match!

Another fine example of how Rubaroc enhances the beauty of the property!
